

Postdoc Position Offer

A postdoc position to work on modelling and simulations of optoelectronic devices for chaos-based optical communications is available under the European Project PICASSO (**Photonic Integrated Components Applied to Secure chaos encoded Optical communications systems**) at the Mediterranean Institute of Advanced Studies, (University of the Balearic Islands-CSIC), Palma de Mallorca, Spain.

PICASSO

Candidates should have a deep knowledge on modelling of semiconductor lasers and programming skills.

- Duration: 1 year (with renewal possibility), starting immediately
- Salary according to candidate experience (starting at 24.000 euros / year)
- Contact persons:
